

STONE RECEPTION COMPANY

— CREATING A GREAT FIRST IMPRESSION —

DESIGN | FABRICATION | INSTALLATION

Beautiful reception desks made from natural stone, created by the Stone Reception Company. Our combined industry experience spent working with stone, office furniture and interiors enables us to create these beautiful stone reception desks. Incorporating current design trends with the magnificence of natural stone, the result is a range of exquisite desks.

An independent company with access to a vast range of stone, each desk is craftsman made to suit your unique requirements.

How We Work

Consultation:

With 25 years of experience behind us, spent operating within the stone and office furniture industries, we understand our clients' need for independent advice. Experts in our field, we provide a full consultation to aid the decision-making process, ensuring that the chosen raw material is best suited to the style of reception desk required.

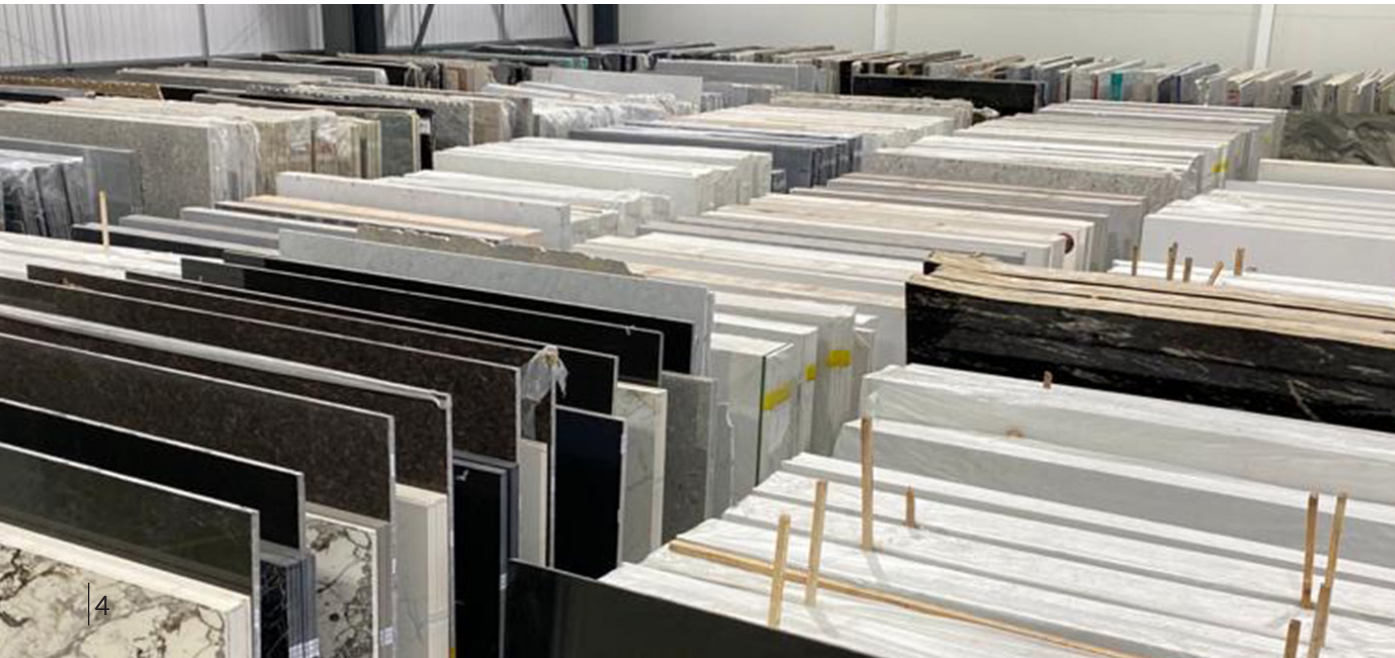

We constantly monitor manufacturing, design and material trends, ensuring that the products recommended provide the ideal solution for every type of reception area.

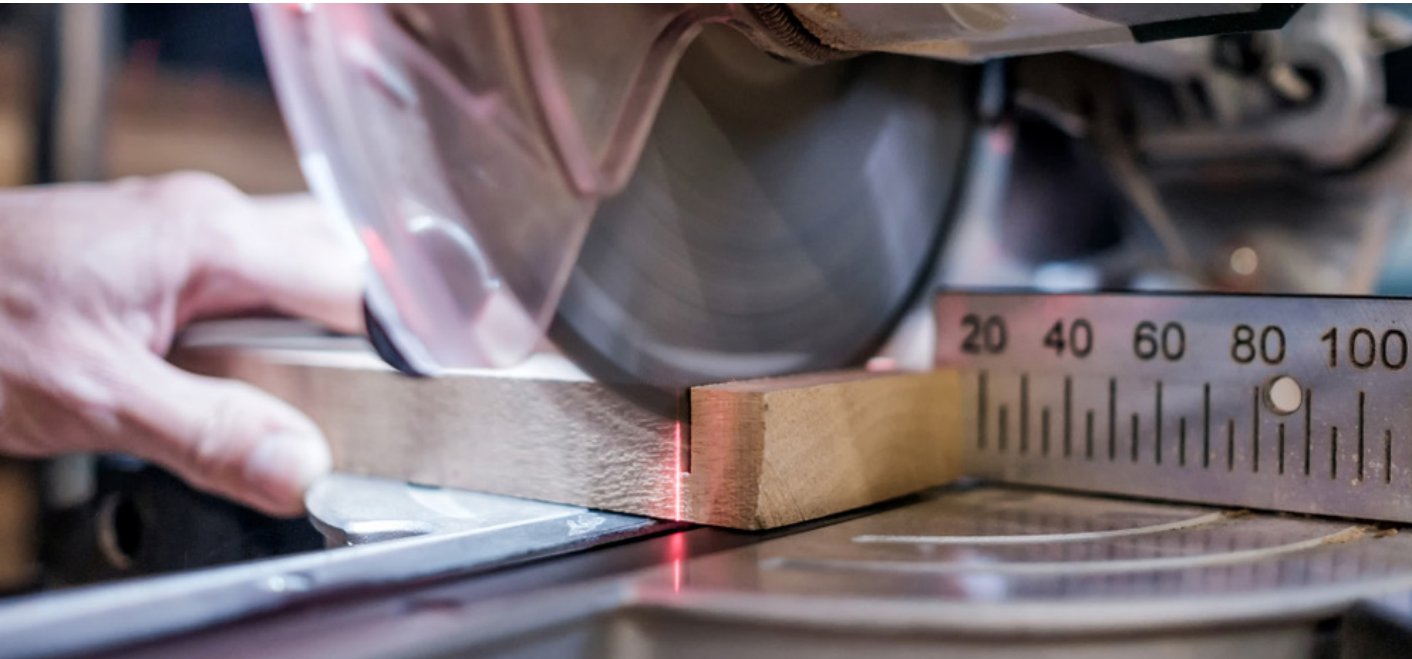

Material Selection:

Whichever type of stone you desire, we have it. Choose from Quartz, Granite, Ceramic, Corian and Dekton. All lend themselves to being used for a range of architectural and design purposes. We can provide full project management through to supply and installation. The suitability of the stone selected is based upon the size, type of use and technical requirements.

The purchasing process will take heed of the quarrying times, ensuring that you receive the correct material on time.

Joinery:

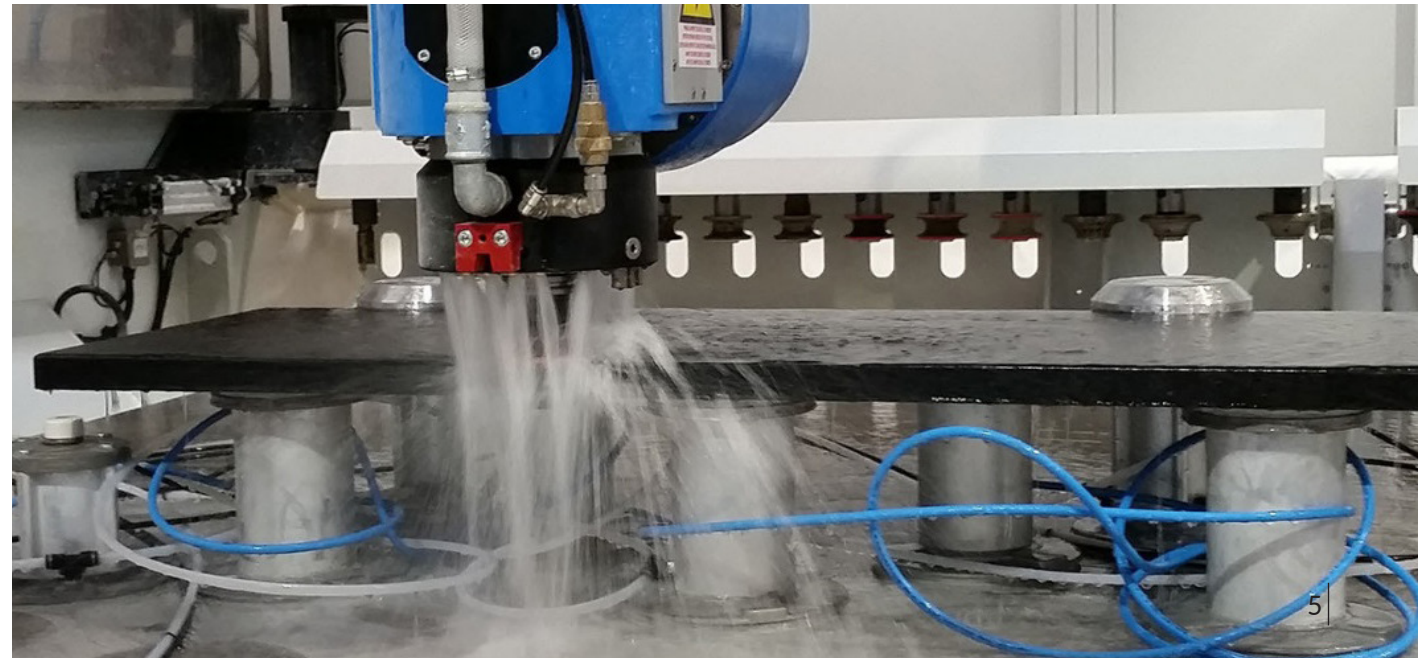

Networking with experts throughout the joinery sector, we provide an all-encompassing design, manufacturing and installation service. By making use of craftsmen-led techniques coupled with state-of-the-art technology, you receive an exceptionally fine finished product.

Quality is assured by our carefully refined design and manufacturing processes. Your new reception desk will not only look fantastic but also provide superb value for money. We never cut corners, going the extra mile to provide you with reception furniture that makes an incredible first impression.

Fabrication:

Our beautiful products are both durable and practical. The preferred supplier of many interior design specialists, architects and high-end property developers, we are a one-stop-shop for all types of stone fabrication, including the designing of reception desks. Our products are carefully honed to fit with the demands of current trends.

Quality is assured and affordable prices guaranteed. Our success is due to our dedication to our craft. Passionate about what we do, our attention to detail is meticulous.

Design Services

Stage 1: Design Consultation:

Working predominantly with commercial clients, architects and specifiers, we provide a free initial consultation which allows us to carry out a detailed survey. Paying careful attention to the maximising of floor space, we can create layouts and visuals, giving an overview of the finished look.

Floor plans will be two-dimensional or three-dimensional, based upon information collected during the site survey. Design layouts provided by us will show the exact position of the desk as well as visuals depicting views from varying aspects.

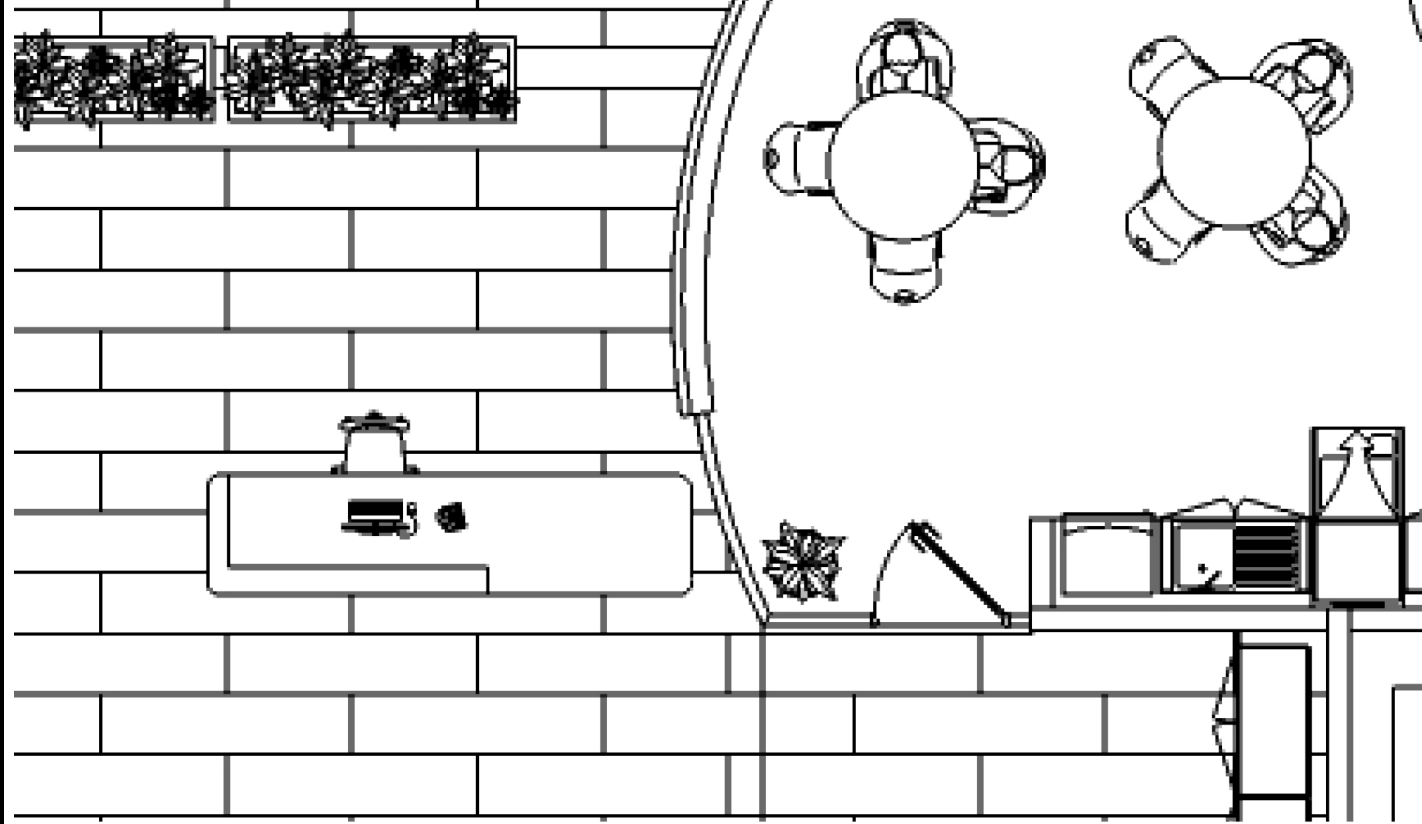

With the measurements in place, the second part of the consultation will be a careful discussion about the type of stone to use for the reception desk.

Attention will be paid to colour and design as well as the practicalities involved. Our extensive collection of stone product samples enables clients to get an exact idea of how the finished item will look in place.

Stage 2: 2D

After our free-of-charge design consultation process and survey, we will provide you with a two-dimensional floor plan. This will show the proposed design in a 2D plan view layout, giving you a virtual impression of how the area will look with your new reception desk in place.

We ensure you get the most out of your space by carefully fine-tuning the layout. Our technical team will make any amendments required to the design until you are 100% happy

Stage 3: 3D Rendered Views

We make use of the magic of 3D design to bring 2D plans to life. Nothing beats the impact of 3D, enabling you to see just how your reception desk will look once completed.

Once you have approved the 2D version of the design, we pass to our 3D team. They produce a precise 3D visualisation of your new reception area. We make the design pop by adding your chosen colours to the walls, floors and stone desk.

Model 1

Reception

This stunning linear stone reception desk available in 3 sizes: 2200mm, 2800mm and 3200mm, other sizes available on request. Desk shown has been designed using Quartz material, the colour chosen was Silestone Eternal Noir, complete the Glass Counter Shelf and LED Lighting.

Materials

Quartz

The remarkable material that is quartz lends itself perfectly to being used in any type of commercial environment. Beautiful, durable, strong and tough, reception desks made from natural quartz add a touch of elegance to any setting. Almost as tough as diamonds, quartz is non-porous and comes in a splendid array of patterns and colours.

For a reception area that impresses, choose Quartz.

Granite

Damage-resistant granite is incredibly tough and durable, being formed under the Earth's surface from molten magma. With a wondrous depth of colour and incredible shades, ranging from the palest of pinks through to deepest black, some slabs of granite have silver or golden specks that add lustre and reflect light.

For a reception desk that stands out, making a real statement, choose Granite.

Ceramic

The perfect mix of classical and contemporary aesthetics, reception desks made from ceramic always look good in any type of setting. Providing stunning good looks, this material makes a powerful first impression. Hardwearing, fire and scratch-resistant, it's easy to keep it looking as good as new.

With so many varying colours and shades to choose from, you truly will be spoilt for choice.

Dekton

Dekton is a wonderful material and an extremely popular choice in the world of design and architecture. Not only is it scratch, stain and heat resistant but it looks incredibly sophisticated. Created from the mixing together of porcelain, glass and quartz under high pressure, the surface is uniform and resistant to fading.

The ideal choice for either contemporary or traditionally-styled reception areas.

Corian

Corian is an innovative material that makes use of design-led aesthetics, making it the perfect choice of architects and designers. Providing a rich choice of colours, when design is key, Corian ticks every box. With inconspicuous joints, desks crafted from Corian provide seamless expanses of material that is warm to the touch.

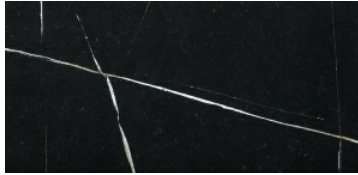

A Corian reception desk is truly a thing of beauty.

Order Process

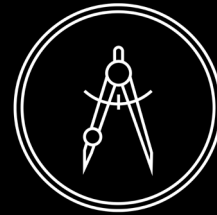

Process 1: Consultation

Our free-of-charge consultation provides a detailed survey and discussion. Used to working with all types of commercial clients, as well as specifiers and architects, key areas of attention include maximisation of floor space.

We also create detailed visuals and layouts to give a full overview of the finished project. These are created using the measurements obtained during the site survey and will show precisely where the desk will be sited, with views from different aspects.

Consultation

Design

Process 2: Design

Our skilled design team can produce both 2D and 3D drawings once the free-of-charge site survey is complete. Before finalisation, we will discuss with you and make any amends.

The 2D and 3D layouts provide a great way for clients to see how their new stone reception desk will look once complete and in place. By viewing the desk from different angles, costly and time-consuming changes in the design, later on, are avoided.

Quote

Process 3: Quote

Our free-of-charge quote is fully comprehensive and the pricing transparent. Once the consultation and design process is finalised, you will receive our proposal. This will take account of everything that has been discussed including size, style, material and colour.

Valid for 30 days, our quote will not change unless there is an alteration to the availability of the chosen material. (This may be relevant if the client selects granite as the material of choice.)

Order

Process 4: Order

Once you accept our quotation, your order will pass to our operations team. Upon payment of the deposit, materials will be ordered. Please allow as much lead-time as possible where raw materials are subject to rarity, such as specific forms of granite.

Your desk will then be fabricated following the approved design plans. When ready to install, we will fix a convenient time slot with you. Final balance payment is required before delivery and installation.

Process 5: Fabrication

Fabrication of your bespoke stone desk will begin once deposit has been received and raw materials have arrived. The formation will be fully in line with the technical drawings produced by our design team and agreed by you.

Our production methods are state-of-the-art - slabs of raw material are machined using CNC technology. Edges are profiled and the surface finely hand-polished by our team of skilled stonemasons. Quality assurance tests complete the fabrication process.

Fabrication

Installation

Process 6: Installation

Installation day brings with it plenty of excitement. Our installation team will have liaised with you in advance to fix a convenient installation date and time. The process will vary according to the fabric of your desk: Corian Desks are delivered to site prefabricated and ready to install.

Quartz, Granite, Ceramic and Dekton Desks arrive as individual components to be assembled on site. Work is not considered complete until you are happy with the finished product.
